

MD. TANVIR ALAM

CHIEF TECHNOLOGY OFFICER & SENIOR SOFTWARE ENGINEER

Dhaka, Bangladesh | +8801716416679 | tanviralamshuvo@gmail.com | [linkedin](#) | [github](#) | tanvir-ux.github.io

PROFESSIONAL SUMMARY

Strategic, performance-driven **Chief Technology Officer** and **Senior Software Engineer** with a continuous track record of architecting distributed enterprise systems and AI automation engines. Specialized in the Java ecosystem (Spring Boot, Grails), microservices, and event-driven architectures designed to scale up to millions of active users. Proven history of collaborating with top-tier global financial clients, reducing deployment cycles by **70%**, and designing autonomous agentic AI pipelines. Recognized for leading cross-functional teams and actively contributing to open-source core web engines.

CORE TECHNICAL CAPABILITIES

AI & Data:	Agentic AI, LangChain, FastMCP, RAG Pipelines, Keras, TensorFlow, PyTorch, LLM Integration
Backend & Arch:	Java, Spring Boot, Microservices, Grails, Node.js, Python, FastAPI, OpenAPI, REST API Design, JVM Tuning
Database & Data:	Oracle PL/SQL (CDB/PDB), PostgreSQL, MySQL, PySpark, Databricks, Flyway, Real-time Data Synchronization
Cloud & Infra:	AWS, GCP, Azure, EKS, ECS, Lambda, S3, Docker, Kubernetes, Apache Kafka, Redis, MQTT, VerneMQ, Nginx, GitHub Actions

PROFESSIONAL EXPERIENCE

Jonlab LLC — Chief Technology Officer (CTO)	Nov 2025 – Present
Executive Architecture & Strategy: Define long-term technical vision and strategic roadmaps, orchestrating cross-functional engineering teams to scale robust backend systems. AI & Automation Integration: Direct the design and production-level integration of enterprise Agentic AI pipelines and custom LLM interfaces, cutting operational costs and accelerating business intelligence. Technology Modernization: Spearhead system improvements across legacy business layers, establishing high-availability microservices models that optimize system stability and server performance.	
MehvozSoft — Lead Software Engineer / Application Developer	Aug 2025 – Nov 2025
Agentic AI & LangChain Orchestration: Designed and developed self-executing AI agents via LangChain, orchestrating multi-step logical reasoning models to eliminate manual oversight by 40%. Retrieval-Augmented Generation (RAG): Engineered clean RAG architectures that allow private language models to safely query internal system document repositories and execute external API endpoints via tool-calling. Distributed Event Systems: Integrated highly resilient messaging pipelines utilizing Kafka and Redis to streamline background processing, drastically optimizing core Java/Spring Boot performance metrics.	

PROFESSIONAL EXPERIENCE (CONTINUED)

Midas Software Solutions Ltd. — Senior Software Engineer (Java)

Mar 2023 – Aug 2025

- **Bank Danamon (Indonesia) — Microservices Modernization:** Architected and executed the critical migration of the bank's core digital banking monolith to a distributed Spring Boot microservices structure, delivering **70% faster deployment cycles** for high-concurrency instances.
- **High-Concurrency API Scaling:** Designed, optimized, and maintained over 100 microservice endpoints utilizing OAuth2 and JWT protocols, ensuring stable execution for **50k+ concurrent users**.
- **SMBC (Singapore) & Oracle — Custom Core Engineering:** Customized and deployed high-performance banking modules inside Oracle FLEXCUBE and Oracle Banking Payments (OBPM) architectures using JavaScript, XML, and PL/SQL to securely execute cross-border SWIFT financial transactions.

MehvozSoft — Application Developer

Sep 2021 – Feb 2023

- **Mobile Ecosystem Delivery:** Developed and deployed cross-platform responsive mobile utilities (including Express Entry Calculator and Adhaan applications) on iOS/Android platforms using the Ionic and Angular frameworks.
- **Database Architecture Optimization:** Crafted complex database schemas and optimized SQL queries, indexing strategies, and procedures using PostgreSQL and MySQL to accelerate transactional execution times.

VERIFIED OPEN-SOURCE CONTRIBUTIONS & MILESTONES

- **Meta Open Source (Docusaurus):** Solved a critical race condition within collapsible layout structures by developing direct programmatic bypass routes inside CollapsibleBase (PR #12196).
- **Google Chrome Core:** Contributed system-wide diagnostic parameters for tracking Google Chrome's Lighthouse auditing engines (Issue #10721).
- **Keras Deep Learning:** Authored and merged 7 complex layout logic updates within the main keras-team/keras-io codebase (PR #596), reviewed directly by creator François Chollet.

EDUCATION

Stamford University Bangladesh — B.Sc. in Electrical & Electronic Engineering (EEE)

Graduated Sep 2021 | CGPA: 3.25
